PODSCROLL INSTRUCTIONS

A PodScroll is a booklet or series of images that can only be downloaded onto colour iPods or Media Players capable of storing libraries of pictures.

Transferring podscrolls to your iPod from a computer

1 **For Mac users -**
Open **iPhoto** from the Applications folder and drag the podscroll (e.g. Ward's Piece Podscroll) into the left-hand column to create a new photo album.

For PC users -
Drag the podscroll (e.g. Ward's Piece Podscroll) into the **My Pictures** folder, which can be accessed via the **Start** menu.

2 Connect your iPod to the computer and open **iTunes**.

3 Select iPod from the **Devices** menu down the left hand side of the screen.

4 Click the **Photos** tab and ensure the **Sync photos from:** box is checked and set to iPhotos (for Mac) or My Pictures (for PC).

5 By checking the **Selected Folders** option you can choose to synchronize just the podscroll folder from the pop-up menu.

6 Select the **Include full-resolution photos** checkbox.

7 Sync your iPod and you will find the podscroll under the Photos menu of your iPod.

8 Click the Photos tab and check that your iPod is set to synchronize with your iPhoto albums.
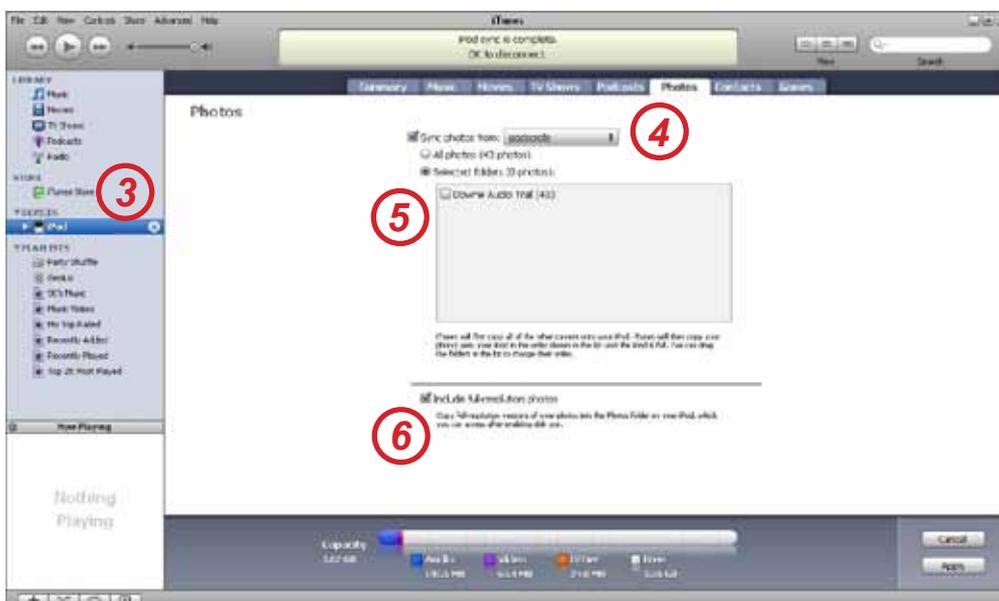

Using podscrolls on your iPod

Select the podscroll and click the iPod centre button twice. Use the scroll wheel or the Next ⏭ and Previous ⏮ buttons to. The slideshow function will launch if you press ▶❚❚, this can be stooped by pressing the Menu button. Headers and page numbers on each page help with navigation.
